Setting up Your Game

Everything you need before the first official roll.

What's Inside This Game?

- 1 game board with about 40 spaces
- 2 - 6 players
- 1 die
- 80 trivia cards, 20 per habitat
- 10 whirlpool tokens

How to Set Up This Game

- Place the board where every player can reach it.
- Shuffle the four habitat decks separately.
- Place each deck beside its matching board colour.
- Place all whirlpool tokens beside the board.
- Choose a pirate and place it on the Ancient Vault.
- Roll once to choose who starts. Highest roll goes first.
- The winner of that roll rolls again to begin the game.

IMPORTANT!

Your first roll only decides who goes first. Do not move your pirate. The winning player rolls again to begin their first turn.

Page 6

Reach the Docks to Escape

Only when your four habitat colours are complete can you calm the Sea god's rage.

YOU WIN WHEN

You reach the Pirate Docks at the end of the rope with at least one card from each of the decks (Deep Ocean, Coral Reef, Kelp Forest, and Shoreline).

At the Docks Without All Four?

- Leave your pirate at the Pirate Docks.
- On your next turn, choose one habitat colour you are missing.
- Another player reads one card from that deck.
- If you answer incorrectly, stay at the docks and try again next turn.
- If you answer correctly and have all one card from each deck, you escape and win the game!

Here's an example

- Maya has Deep Ocean, Coral Reef, and Kelp Forest cards.
- She reaches the Pirate Docks but has no Shoreline card.
- Maya stays at the docks.
- On her next turn, she chooses the Shoreline deck.
- She answers correctly and keeps the Shoreline card.
- Maya now has all four colours, so she escapes and wins the game!

NO EXACT ROLL NEEDED

If your movement reaches or passes the Pirate Docks, stop at the docks and check your four colour collection.
